

A technical drawing of a torus (donut shape) shown in a perspective view. The drawing consists of many closely spaced, curved lines that define the surface of the torus. To the left of the torus, there are two vertical lines connected by a horizontal line at the top and bottom, forming a dimension line. To the right of the torus, there are two vertical lines connected by a horizontal line at the top and bottom, also forming a dimension line. Two diagonal lines extend from the top-left and bottom-left corners of the drawing area towards the center of the torus, likely indicating a viewing direction or a specific section.
